

SHAPE YOUR WORLD

IT'S NOT JUST ABOUT DIGGING

The quarrying, mining and mineral products industry is the UK's largest manufacturing sector. It's the bedrock of construction and the built environment, from extracting and processing minerals to making building materials. It also supports many important sectors like agriculture, automotive, pharmaceuticals and technology.

A diverse industry means hundreds of job opportunities and places to work. Whatever your interests, be part of an industry that's essential to everyday lives.

Make a difference

Help tackle some of the world's biggest challenges. You could be developing products that adapt to changing climate conditions, finding ways to reduce the use of new materials from the ground, or finding solutions to reach net zero carbon emissions.

Support a wide range of industries

Mineral products are used everywhere from food production to pharmaceuticals, technology to automation. The biggest user is the construction industry – minerals are used in products like glass, steel, bricks, concrete and asphalt.

Earn great money

On average, higher apprentices earn almost double the national minimum apprentice wage. The average starting salary for people in the industry is higher than for other graduates.

Travel the globe

This is a global industry and the skills you develop will be in demand worldwide. Work in dynamic teams with people all over the world.

Be in demand

People in the quarrying and mineral products industry are needed now and in the future. The industry has existed for centuries and will continue to be

in demand because it provides products to the rest of the economy. The sector provides a career for life and many opportunities that you can progress through.

Gain respect

Gain qualifications and progress your career. With an emphasis on personal development, this industry will help you gain professional recognition for your achievements.

Diverse roles and inclusive opportunities

Whether you want to work mainly outside or within an office environment, work with people or using the latest in technology, there will be something that suits your skill set.

Shape your world

Be a part of the industry that is shaping your world now and in the future. Whether through producing materials used all around us every day, restoring sites and preserving biodiversity or finding solutions to address global challenges, your contribution matters.

Choose your own route

Go to college, do an apprenticeship, take a T level, get a university degree, switch careers or combine different routes.
